

(Resveratrol) 5mg
RESVERATROL SUPPLEMENT FOR DOGS

Gelatin Capsules

Composition:

Resveratrol – A naturally occurring polyphenol demonstrating diverse health benefits including antioxidant, anti-inflammatory, cardio protective and neuro protective properties. A number of preclinical findings suggest resveratrol having high therapeutic potential for cancer prevention and treatment.* It helps support normal metabolic function and been shown in studies to counter insulin resistance.**

*[National Cancer Institute](#) Fact Sheet "What is resveratrol and how does it prevent cancer?"

**[Cell](#) 127, 1109-1122, Dec 15, 2006 *Resveratrol Improves Mitochondrial Function and Protects against Metabolic Disease*

Atlantic Kelp – Rich in vitamins, trace minerals and amino acids which are essential for complete nutritional support. Sea kelp is also a natural source of iodine beneficial for thyroid and glandular health and it improves digestion and reduces stress.

Flaxseed Oil – An excellent source of Omega-3 fatty acids are critically important for neuromuscular development, skin health, coat quality and are used for inflammatory skin diseases and infections, arthritis and flea and food allergies. Omega-3 fatty acids reduce triglycerides and cholesterol and help prevent blood clots.

Lecithin – A sustainer to the nervous system and brain promoting alertness and steady nerves. Lecithin emulsifies fat, improves digestion of fats, and helps remove fatty liver deposits for a healthier liver and improved metabolic process.

Ingredient Source: All the ingredients in Resvantage Canine® are naturally occurring. Resveratrol is found in more than 70 different plant varieties including grapes, peanuts, pomegranates, blueberries, pines and Giant Knotweed. Resvantage® sources its trans-resveratrol from the Knotweed plant; Botanical name - Polygonum Cuspidatum. This is the same source of pharmaceutical grade resveratrol used in studies conducted by the NIH and other medical research institutions and universities.

Capsule Integrity: Resvantage Canine® is manufactured to cGMP* standards and a rigorous quality assurance program. It is lab tested during all phases of the process insuring that the active compounds are free of heavy metal toxicity and microbiological contaminants.

RESVANTAGE CANINE® is Laboratory Tested and then encapsulated in an oxygen-free, nitrogen-rich environment by the Capsugel® division of Pfizer utilizing their exclusive patented Licaps® process. This helps prevent oxidation and ensures that each capsule retains its potency.

Nitrogen Packed and Air Tight Sealed for Maximum Integrity.

Administration: Resvantage Canine® capsules are intended to be taken orally.

Suggested Use: Give dogs 1 capsule daily for every 30 lbs. If giving more than one capsule daily, divide between AM and PM. Suggested dose may be increased safely for managing acute/severe conditions such as cancer or diabetes.

Safety/Resveratrol: Resveratrol is well tolerated and safe for long-term daily use. There are no known side effects or contra-indications associated with resveratrol supplementation.

Precautions: Resvantage Canine® may reduce the need for medications for the treatment of inflammation, insulin resistance, cardiovascular or other diseases. If the dog is undergoing treatment for these, monitor and re-establish appropriate levels of medication.

Warnings: Not for puppies less than six (6) months old.

Storage: Store at room temperature, between 59°-86° F (15°-30° C). Brief periods of up to 104° F (40° C) are permitted.

How Supplied: Carton containing 30 liquid-filled capsules.

We also offer pharmaceutical grade resveratrol supplements for Humans, Felines and Equines. For more information please visit our website: www.resvantage.com
