

## Ultra Oil Skin & Coat Supplement with Hempseed Oil

When supplementing oils to your pet's diet it is very important to watch the ratio of Omegas 3,6 & 9 and to include all three in the diet.

When using a super premium, natural or holistic commercial food they generally contain a balanced ratio of Omega 6 and 3's, but many do not contain important omega 9's in their diets at all. Ultra Oil for Pets blend has been carefully formulated in the proper ratios and so it can be used in conjunction with a better commercial dog foods and homemade diets and not disrupt the ratio balance.

Omega-6 and Omega-3 are Essential Fatty Acids involved with producing life's energy. Pets often have a dietary deficiency in Essential Fatty Acids due to a high intake of animal fats. These Omega-3 and Omega-6 Fatty Acids can promote skin and coat health, including relief of skin dryness, dandruff and psoriasis caused by a lack of high-quality Essential Fatty Acids. Omega Fatty Acids are thought to help both skin and coat by improving cell membrane function-essentially lubricating skin tissue from the inside. Proper

levels of Essential Fatty Acids are also associated with mood and mental function and necessary in helping to prevent debilitating diseases such as cancer.

Ultra Oil for Pets is composed of the best nutrients nature can provide. Our Primary ingredient Hempseed Oil is a perfect balance of Omega-3, Omega-6 and Omega-9. Then we add flaxseed oil and fish oil in order to get the full spectrum of healthy fats in just the right ratios so that they can all be optimally absorbed. This allows for the deep healing effects you see with Ultra Oil that other supplements just can't provide. Grapeseed oil is the final touch and provides important antioxidants to get rid of toxins and waste and it also acts as a natural preservative. GMO-Free, Gluten-free, Herbicide & Pesticide free. Excellent source of essential fatty acids including Omega 3, 6 and GLA
